## EXAMPLE 1-1

Even though the spelling checker is turned on automatically in Office PowerPoint 2007, it is still a good idea to check spelling again after you finish working on your presentation:

On the Review tab, in the Proofing group, click Spelling.

If Office PowerPoint 2007 finds spelling mistakes it displays a dialog box, and the first misspelled word found by the spelling checker is selected. You indicate how you want to resolve each error that the program finds. After you resolve each misspelled word, the program selects the next one, and so forth.
